

BUILD A BIRD BUFFET™

Fly-by diner

BUILDING INSTRUCTIONS

Multi-lingual instructions available at: www.beetleandbee.com

WARNING:
CHOKING HAZARD - Small parts.
Not for children under 3 years.

CAUTION: Toy contains functional sharp points (nails and hooks). Adult supervision recommended.

CONTENTS

*** YOU WILL ALSO NEED A HAMMER TO COMPLETE THIS PROJECT**

TIP: Read the instructions thoroughly before starting your project.

- 1** Sort & identify all pieces. Ask an adult for help & locate a hammer.
- 2** Place Floor (A) on a flat surface.
- 3** Take one of the Shaped Sides (B) & match up the nail holes on the bottom of the Floor (A). Run a thin line of glue on the inside of (B) where the pieces will meet.
- 4** Using the hammer, carefully place a nail in each hole. Mind your fingers!

TIP: Don't hammer the nails all the way in. Leave a little room to make it easier to slide the walls into place.

- 5** Add a hook to the top edge of (B).
- 6** Repeat steps 3-5 with the other Shaped Side piece (B).
- 7** Next, take a Side Wall (C) & run a thin line of glue on either side. Gently slip the Side Walls between the two Shaped Sides making sure to match up nail holes. Place a nail into each hole. Repeat with the other Side Wall piece.
- 8** Secure your structure by hammering all nails firmly into place.

- 9** Lay Roof Panel (D) flat on working surface. Place Roof Panel (E) at a 45-degree angle on top of panel (D), matching edges & nail holes. This is the only way to put these pieces together. This will insure proper alignment. Once you have lined up the nail holes, remove panel (E) & run a thin line of glue along the connecting edge. Place back up at a 45-degree angle & hammer a nail into each nail hole. Hammer nails completely into place.
- 10** Paint or decorate as desired, then let sit overnight to let the paint & glue dry.
- 11** Connect one end of the chain to a hook. Run it through a hole in the bottom of the roof, across the top & back down through the hole on the other side of the roof. Connect the end of the chain to the other hook.

TIP: If the chain is too long, use pliers or tweezers to feed the chain through the holes or to shorten it.

- 12** Fill with your favorite birdseed & hang outside on a branch or post. Place your feeder near a window so that you can observe the variety of birds that come by to feed.
